# DICKSON  JOSHUA  UGOCHUKWU

Full Stack Web Developer

www.linkedin.com/in/josh-dickson- b91a29297

jodicksonjoshua@gmail.com

08079121375

Owerri-west, Imo state, Nigeria

## Education

09/2018 - Present

### High school

As a high school student at Starlight International Secondary School, I am actively shaping my academic journey with a focus on both excellence in the classroom and hands-on experience in web development. Achieving consistently high grades across diverse subjects, I have demonstrated my dedication to academic success. Beyond the curriculum, my passion for technology led me to immerse myself in web development projects. Through self-directed learning and participation in coding clubs, I have gained practical experience in HTML, CSS, and JavaScript, creating responsive and user-friendly websites. This hands-on experience has not only expanded my technical skills but also provided me with valuable insights into the rapidly evolving field of web development. As I continue to navigate the challenges of high school, my goal is to further integrate my academic pursuits with my passion for technology, contributing to both my school community and the digital landscape.

## Top Skills

Visual Web Development
Software Infrastructure
PHP

## Experience

### Gigster
Front-end Developer
(Remote)
January 2021 - Febuary 2023
(2 years 2 months)
Lagos, Lagos State, Nigeria

## Personal details

Date of Birth
October 12,2004

# Summary

## Web Developer Experience Journey
Introduction to Web Development (2017 - present)

Self-study in web development.

Acquired fundamental skills in HTML, CSS, and JavaScript. Created personal websites and small projects for practice. Entry-Level Web Developer (2017)

Joined a small web development agency.

Developed simple client websites.

Became proficient in responsive design and cross-browser compatibility.

Collaborated with senior developers on larger projects. Front-End Developer (2017-2020)

Transitioned to a mid-sized digital agency.

Specialized in front-end development.

Mastered CSS preprocessors (Sass, LESS) and JavaScript frameworks (jQuery).

Worked on e-commerce and content management system (CMS) projects.

Full-Stack Developer (2020-2023)

Joined a startup as a full-stack developer.

Gained expertise in server-side scripting (Node.js). Designed and developed RESTful APIs.

Collaborated with UX/UI designers to create user-friendly web applications.

Led front-end development teams on multiple projects.

Kept up-to-date with the latest web development trends, tools, and frameworks.

Participated in online courses and attended industry conferences. Pursued certifications in areas such as web security and performance optimization.

Personal Projects and Side Hustles

Worked on personal web development projects, including personal blogs and portfolio websites.

Dabbled in app development and explored emerging technologies like WebAssembly.

Building Strong Online Presence

Maintained a professional website and portfolio showcasing work and skills.
Actively participated in online developer communities (e.g., GitHub, Stack Overflow).
Gave talks at local developer meetups and shared knowledge through tutorials.
